

ALIYAH ALABDALI

+966 565 054 530 | AliyahAlabdali24@gmail.com | [LinkedIn: Aliyah Alabdali](#) | Makkah, Saudi Arabia (Ready to Relocate)

PROFESSIONAL SUMMARY

Artificial Intelligence graduate with First Class Honors experienced in building end-to-end AI solutions across Computer Vision, NLP, and Generative AI, covering model development and full-stack deployment. Delivered real-time computer vision systems and AI-powered SaaS features during an AI venture-studio co-op. Seeking an AI, Machine Learning, or Software Engineering role where I can develop impactful, production-ready solutions.

EDUCATION

Bachelor of Artificial Intelligence | Umm Al-Qura University, Makkah, SA *June 2026*
First Class Honors | GPA 4.0 / 4.0

EXPERIENCE

Artificial Intelligence Trainee (Co-op) | InPro Studio, Makkah, SA *Mar - June 2025*

- Delivered AI features for two Generative-AI SaaS platforms, **Corbel** (idea validation) and **Pillars** (MVP builder), as a core member of the AI team.
- Designed the platform AI architecture around a **Chat + RAG** approach and defined product requirements across the PRD and SRS.

Banking Trainee (Online) | Banque Saudi Fransi Supervision Program *Aug 2024 - Nov 2025*

- Completed a Vision 2030-aligned program in Agile, project management, and problem-solving.

PROJECTS

Yaqidh: AI Child-Safety Monitoring System | Graduation Project *2025 - 2026*

Computer Vision · YOLOv8 · PyTorch · ONNX · OpenCV · FastAPI · PostgreSQL · React

- Built an **end-to-end** real-time system that detects child falls and violence from live CCTV and pushes instant, role-based alerts to parents, teachers, and managers.
- Trained two custom YOLOv8 models reaching **0.81 / 0.66 mAP@50** (fall / violence), a **2-3x gain over baselines**, and cut inference latency **~20%** via ONNX optimization.
- Shipped the full stack (FastAPI, PostgreSQL, React) with secure JWT/RBAC access and live analytics dashboards.

SMS Scam & Spam Detection | Advanced Deep Learning *2026*

NLP · Transformers · PyTorch · Scikit-learn

- Built a Transformer-based NLP classifier that flags scam/spam messages at **98% accuracy** and **0.95 macro-F1** on a highly imbalanced dataset.

Brain Tumor Classification System | AI System Design Project *2025*

Deep Learning · YOLOv8 · ONNX Runtime Web · React · Vite

- Built a **privacy-first** web app that classifies brain MRI scans into four tumor types entirely in-browser, with no patient data leaving the device.
- Delivered **~79% accuracy** at **~9 ms inference** from a lightweight ~1.5 MB model, with real-time confidence scoring.

SKILLS

TECHNICAL

Languages: Python, SQL

AI / ML: PyTorch, YOLOv8, Transformers, Scikit-learn, OpenCV, ONNX

Concepts: Machine Learning, Deep Learning, Computer Vision, NLP, LLMs

Software & Data: FastAPI, React, PostgreSQL, REST APIs, Git / GitHub

SOFT

Leadership, Problem-Solving, Teamwork, Communication, Critical Thinking, Time Management, Self-Learning

CERTIFICATIONS

AWS AI Practitioner Challenge (Udacity)

Microsoft Azure AI Fundamentals (Microsoft & SDAIA)

Designing & Implementing an Azure AI Solution (Microsoft & SDAIA)

Generative AI with Azure OpenAI Service (Microsoft & SDAIA)

HONORS & AWARDS

- Dean's Honor List (Academic Excellence Track)** | Umm Al-Qura University | Spring 2026
